Subj: SAMPLING OF MIDDLEFIELD-ELLIS-WHISMAN WELLS LOCATED ON OR
NEAR NAVAL AIR STATION, MOFFETT FIELD, CA

This is to confirm the telephone conversation on 15 October 1990 between Mr. Dale Craddock of Canonic Environmental (Canonic), the Middlefield-Ellis-Whisman (MEW) Companies' Consultant, and Mr. Michael Howar of James M. Montgomery, Consulting Engineers, Inc. (JMM), a consultant to the U.S. Navy, concerning the Navy collecting and analyzing water samples from the new wells located on or near Naval Air Station (NAS), Moffett Field. A list of wells proposed for sampling and a tentative schedule are forwarded in enclosure (1). This work is described further in a Work Plan written by PRC Environmental Management, Inc. and JMM in September 1990, and approved by the U.S. Environmental Protection Agency (EPA), Regional Water Quality Control Board (RWQCB), and Department of Health Services (DHS).

During the telephone conversation, the parties agreed to use sampling protocol previously established when International Technology Corporation (IT Corp.) sampled MEW wells in 1988 and 1989. Canonic will use their equipment and personnel to purge the wells and collect samples according to established EPA guidelines described in the Work Plan.

Representatives of Canonic and JMM will collect replicates to be analyzed by independent analytical laboratories. Canonic Engineers will be responsible for the proper disposal of the purged water. The Navy would pay for the work done by JMM and one or more of the MEW Companies would pay for the work done by Canonic.

Should you have any questions, regarding this matter, please contact me at Western Division, Naval Facilities Engineering Command (415) 244-2552.

Sincerely,

Original signed by:

STEPHEN G. CHAO
Remedial Project Manager
